

Lawn Starter Plus Tree, Shrub, & Bloom with Earth-Friendly Organics
10-20-8 Fertilizer with 13% UMAXX™

- Encourages root growth and strength
- UMAXX™ stabilized nitrogen will stay available in the soil until the grass plant is ready for food
- Use in turfgrass, gardens, and flower beds to make phosphorus available to plants
- Organics add natural slow-release nitrogen with non-staining iron
- Safe for pets and children
- Apply at 4# per 1,000 square feet of lawn
- Spreader chart on every bag

Endure

A 50lb. bag treats 12,500 square feet on turfgrass. Garden and flower beds: 5,000 square foot coverage.
A 20lb. bag treats 5,000 square feet on turfgrass. Garden and flower beds: 1,000 square foot coverage.

*Endure uses a uniform particle size for improved spread pattern and coverage. Uniform coverage provides even green color and more effective herbicide control. Spreader charts are on each bag. Turfgrass needs fed every six to eight weeks during the growing season.

*All phosphates have been removed from the Endure maintenance products keeping our environmental concerns in mind. Newly seeded turf should be fertilized with Endure 10-20-8 Starter Plus Earth-Friendly Organics at the time of planting. 10-20-8 Starter Plus can be used anytime a soil test result recommends additional phosphate to improve soil conditions.
